

Infosys[®] McCamish NGIN

Empowering the global life insurance industry for accelerated growth and efficiency

Facing a long term low interest regime, competition from new entrants, and continued reliance on multiple platforms, life insurance companies are looking for solutions that empower and drive new business growth and efficiencies. For most carriers, existing platforms are an impediment to rapid market entry with new products and improving operational efficiencies at scale. The industry needs a hyper-efficient, technology platform for new business growth and increased profitability through innovation in operations.

Accelerate profitable growth with Infosys[®] McCamish NGIN

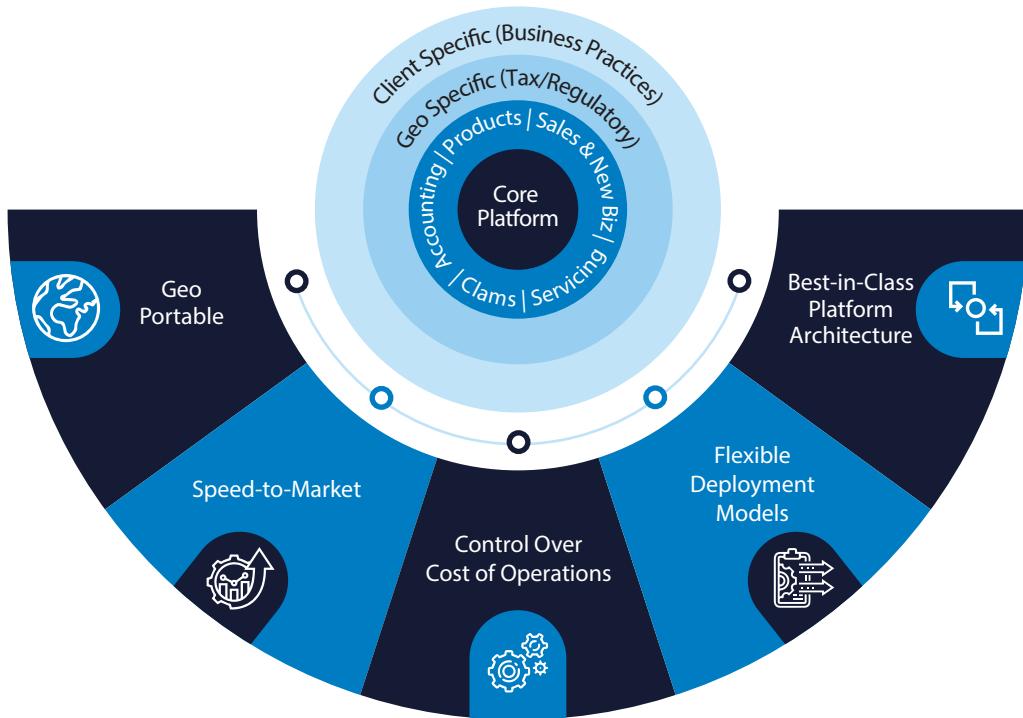

Infosys[®] McCamish NGIN is an industry-leading platform for policy administration for the global life insurance and annuity industry. Aimed at improved operational efficiency and reduced time to market, this cloud-native platform is purpose built with distinct design principles that will help your business to transform and accelerate profitable growth.

This go-to platform is customer, distribution and business operation pleasing, with a comprehensive set of functionalities across the entire spectrum of life and annuity product lines.

Benefits to our Clients:

- Design and launch new products rapidly with NGIN product configurator
- Modern user experience
- Futuristic platform with a state-of-the-art architecture – scalable, secure and extensible
- Simplified PAS ecosystem: Pre-integrated modules and seamless integration with your existing digital investments

Get the Infosys® McCamish NGIN Advantage

Powers speed & agility

- The platform is nimble and responsive across insurance processes and empowers the business to launch new products and variations at unprecedented speed to gain market share
- The API-first approach enables ease of integration
- Configurable business processes at product line level

Promotes efficiency & scale

- All transactions can be configured for straight-through processing, eliminating calls and increasing service efficiencies
- Guided, persona-driven transaction processing results in faster onboarding and more efficient operations
- End-to-end observability of business transactions so you never lose track of the context

Places advanced technology at your fingertips

- The platform is offered in flexible deployment models — license, SaaS, on-premise/ cloud, or full TPA
- Cloud-native platform with an evolutionary and extensible design and scalable architecture promotes configuration rather than customizations
- The core of the platform is geo- and tax regime- independent and can be extended to meet regional and client specific needs rapidly
- Option to use our entire digital ecosystem, or integrate with your existing assets

Infosys® McCamish NGIN is the right choice for carriers looking for nimble market entry, rapid launch of new products and productivity improvements in operations at scale.
