

REVOLUTIONIZING RISK MANAGEMENT FOR INSURANCE

Today, risks are multiplying faster than policies can cover them, leaving insurers with a mounting challenge to stay meaningfully connected with their customers beyond the point of sale. Policies are scattered across platforms, risks remain hidden until it's too late, and insurers are left navigating a maze of regulatory demands, customer churn, and operational silos. The lack of real-time visibility on personalized risk score and actionable insights leads to missed opportunities and costly oversights.

Introducing Infosys Risk Management Concierge (RMC)

Infosys Risk Management Concierge (RMC) is an AI-powered solution, a mobile-first platform designed to help insurers transform how their customers manage risks.

It empowers policyholders with hyper-personalized, always-on, digital-native risk management experiences, bringing the power of enterprise-grade risk intelligence to their fingertips.
